SHIVAM SHUKLA

Senior Frontend Engineer · React.js · Next.js · React Native · TypeScript

+91-7984252615 | shivams91099@gmail.com | https://github.com/shivams10 | https://linkedin.com/in/shivam-shukla-4b870b1b3c

SUMMARY

Senior Frontend Engineer with 4+ years building and scaling React.js, Next.js, and React Native applications serving 10K+ monthly active users. Specialises in frontend architecture, Core Web Vitals and performance optimisation, and TypeScript-first component design, with full-stack delivery across Node.js/Express.js REST APIs, MySQL, Docker, and CI/CD pipelines. Mentors engineers and owns code review across multiple client accounts.

SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3, SQL

Frontend: React.js, Next.js, React Native, Redux, Context API, TanStack Query (React Query), Tailwind CSS, Mantine UI, Three.js, responsive design

Backend & APIs: Node.js, Express.js, REST API design & integration, Server-Sent Events (SSE), MySQL, Firebase, Jest (unit testing)

Performance & UX: Core Web Vitals (LCP), code splitting & lazy loading, bundle optimisation, debouncing & throttling, infinite scrolling, UI animations

AI / LLM Engineering: RAG, LangChain.js, embeddings, prompt structuring, token optimisation, streaming responses, Claude, Cursor

Tooling & DevOps: Turborepo, npm publishing, Git/GitHub, Docker, Jenkins, CI/CD, AWS CodeBuild, AWS ECR, Sentry, Bugsnag, ESLint, Prettier, Husky, Agile/Scrum

WORK EXPERIENCE

Frontend Developer | HumynLabs AI *Oct 2026 – Present*

- Own the humynlabs.ai website end to end across frontend and backend, driving SEO, Core Web Vitals (LCP), and performance optimisation.
- Developed the Humyn Lens Android app and owned its Google Play Store launch — release builds, internal testing, and store compliance.
- Built the app's end-to-end authentication system and its listing page with debounced search, filters, and infinite scrolling.

Senior Frontend Engineer | Spark Eighteen *Sep 2022 – Oct 2026*

- Led frontend architecture across cross-platform products serving 10K+ MAU (4K DAU), partnering directly with clients.
- Mentored 6–7 engineers and led code reviews across client accounts, enforcing code quality and best practices.

Client: KGeN | *Web3 gaming network with 53M+ verified users* | *https://engage.kgen.io/*

- Managed Android and iOS releases (Play Store & App Store) for React Native apps — versioning, store compliance, and rollouts.
- Improved Lighthouse SEO from 60 to 100 and performance from 65 to 98; cut Largest Contentful Paint (LCP) from 2.5s to 0.4s and reduced bundle size by ~40% through code splitting and lazy loading.
- Architected a Turborepo monorepo of 4 Next.js and React.js websites; built and published a reusable authentication npm package shared across apps, shipped via Jenkins and AWS CodeBuild pipelines.
- Built region-aware experiences for Indian and international users, with separate authentication flows, region-specific features, and multi-language support.
- Delivered real-time KYC verification over Server-Sent Events (SSE) and integrated a USDT crypto wallet for send and receive.
- Built 2D animations with HTML, CSS, and JavaScript and 3D animations with Three.js across the websites.
- Implemented debouncing, throttling, and infinite scrolling for large data sets, managing state with TanStack Query, Redux, and Context API in TypeScript; integrated Sentry and Bugsnag for crash reporting.
- Designed and built REST APIs in a separate Node.js/Express.js backend for a CRUD-driven marketing website.
- Built AI-powered developer workflows with Claude and custom skill files, automating code review with CodeRabbit and code generation.

Client: KStore | *E-commerce platform for digital gift cards, vouchers, and gaming top-ups* | *https://kstore.global/*

- Built core e-commerce flows for KStore, including product listing, cart, and payment gateway integration.

Client: HumynLabs AI | *Multi-sensory human data platform for robotics and physical AI* | *https://humynlabs.ai*

- Built the humynlabs.ai website and the Humyn Lens Android app as a client engagement, before joining HumynLabs AI directly in Oct 2026.

Frontend Web Developer | PRP Webs *Jul 2022 – Sep 2022*

- Built React.js interfaces integrated with REST APIs and optimised Shopify and WordPress sites, bringing LCP under 1.5 seconds.

PROJECTS

QA Kit (Personal Project) | *https://github.com/shivams10/qa-workflow*

- Built a Claude Code plugin that automates the end-to-end QA process, removing the dependency on a dedicated QA engineer by turning a PRD, Figma frame, or Jira ticket into mutation-verified tests.
- Orchestrates 3 agents and Playwright MCP; lifted mutation scores from ~53% to ~90% and cut agent context from 32K to 5.5K tokens.

Chat Nest (Personal Project) | *https://github.com/shivams10/chat-nest*

- Built and published an AI chat SDK as a 3-package npm monorepo with SSE streaming, instant cancellation, and token-budget cost controls.

EDUCATION

B.Tech, Computer Science and Engineering, Poornima College of Engineering, Jaipur GPA: 8.75

Higher Secondary (Maths/CS) & Secondary, Lions English School, Silvassa 80% / CGPA 8.2

CERTIFICATIONS

- **Develop Generative AI Applications** — Coursera
- **Frontend System Design** — Namaste.dev
- **Docker Training Course** — KodeKloud
- **The Web Developer Bootcamp** — Udemy

ACHIEVEMENTS

- **Employee of the Month**
- **CodeChef 3-Star** — peak rating 1614 in competitive programming

LANGUAGES

English, Hindi — Full Professional Proficiency
